

## IFMS Building Maintenance Internee Engineer

Balcatta WA 6021, Australia

Casual

### **Job Description**

#### **About the Job:**

As an Internee Engineer, you will be accountable for Condition Assessment on the Rio Tinto IFMS Contract with aim of updating the existing condition of the assets. This would be an onsite internship in the East Pilbara region and would have a 2-1 roster (2weeks on and 1 week off) for 6 weeks or more.

#### **As a member of the Building Maintenance Survey Team Your Responsibilities will include:**

Analysing the current asset condition, collaboration with A & I team to improve the data accuracy and quality for asset data capturing.

The role is aligned to the Sodexo's contractual requirements to support the IFMS Contract with systems and processes to achieve the organizational objectives, driven by client expectations while promoting safe and effective Asset Management practices.

#### **About You:**

To be successful in this role you will ideally have a Degree in Electrical, Mechanical or related Engineering discipline, have the ability to professionally liaise with Sodexo management stakeholders, support centre and site teams, have exceptional verbal & written communication skills, have high level of accuracy & attention to detail, have excellent time management skills and be flexible for travel to Pilbara towns and villages as and when required.

#### **About Sodexo**

Sodexo began operations in Australia in 1982 and now provides on-site services at over 300 diverse locations throughout Australia. Today we have over 4,000 employees in Australia who are part of the global Sodexo team of 425, 000.

Sodexo designs, manages and delivers innovative integrated solutions that not only improve the way our client's businesses run daily, but enhance Quality of Life for our clients, consumers and employees
